

Hello, Friends of ADCO!

From our first day of operation, ADCO Pipe & Supply continues a commitment to providing the widest range of inventory for our customers to tackle all jobs, large and small.

With our original location in Florence and later, Huntsville, we always strive to be your go-to resource for various pipe, drainage solutions, geotextiles, and numerous other water control structures.

The growing support from our customers over the years brings both great pride and motivation to our team. As demand for our materials and service increased, we quickly rose to meet it.

What better way to do that than expand our coverage with an additional location? I'm happy to announce that we have added a brand-new location in Cullman, AL. You can expect the same vast inventory, and soon we will also stock septic system components as part of our offering in Cullman.

## **We're hosting an Open House at our new Cullman location on June 24th, and you're invited! Read more and RSVP below.**

We are thrilled to bring these offerings to a wider footprint in the state of Alabama as well as reaching into Middle Tennessee. Our team looks forward to building lasting relationships with contractors, landscapers, and industrial clients who can benefit from what we have to offer. Don't hesitate to reach out to us to learn more about our products and services.

Sincerely,  
Bill Colloredo  
*President*

---

**Join us at our Cullman location Open House event in June!**

We're thrilled to be expanding our reach with our new Cullman location, and we want you to share in the excitement! That's why we're hosting an Open House event at this new location in June. Details are as follows:

**Date:** Wednesday, June 24, 2025

**Time:** 2PM-5PM

**Address:** 4970 AL-69, Cullman, Alabama 35057

Click the button below to RSVP today. You're welcome to bring your entire staff and family to see all the exciting things we have to offer. It will be a good time for all!

## Each ADCO location is stocked with everything you need to get the job done.

Our customers have come to know with our established Florence and Huntsville locations, and now our new Cullman location, that they can also expect an extensive selection of materials needed to complete their task at hand. Through our multiple locations, ADCO has established a reputation as a trusted resource for contractors throughout North Alabama and South Central Tennessee.

*ADCO Pipe & Supply maintains one of the largest in-stock inventories of any supply house to serve customers throughout these markets with exactly what they need for any size project. We're growing our reach with locations in Florence, Huntsville and Cullman, Alabama.*

Whether that be pipe and fittings for site construction, industrial projects, landscaping, and more, you can rest assured we'll have you covered at ADCO Pipe & Supply:

- ADS HDPE Pipe (High-Density Polyethylene) & HDPE Fittings

- ADS High-Performance Polypropylene (HP Storm Pipe)
- Reinforced Concrete Pipe
- CONTECH Corrugated Metal Pipe
- Erosion Control Materials (Erosion Control Blankets, Turf Reinforcement Mats, Sediment Logs, Silt Fence, & Silt Saver Domes)
- MIRAFI Geotextile Fabrics
- Tensar® Geogrids
- Nyloplast and Precast Concrete Drainage Structures
- StormTech Storm Water Detention Systems
- And More!

**Our product spotlight shines on Tensar® InterAx® Geogrids.**

Tensar InterAx Geogrids provide the most advanced geosynthetic made for trafficked surfaces and foundations and are ideal for subgrade stabilization, pavements, and working platforms. Invented by Tensar in the late 1970s, InterAx Geogrids are a category of geosynthetic material that can be used to provide the functions of reinforcement, stabilization, and filtration. They are the most advanced and best-performing geogrid developed by Tensar, and ADCO is proud to offer this invaluable material at all our locations.

With applications in rail trackbed, road foundations, pavement layers, and other high-trafficked areas, the optimized geometry of these geogrids improves confinement of granular particles and creates a highly stabilized layer that is able to stand the test of time. The geogrid is manufactured from a highly durable coextruded, composite polymer sheet, which is then punched and oriented. The resulting structure allows aggregate to strike through and provide confinement, interlock, and superior strength and rigidity.

**InterAx geogrids** provide the highest-performing geogrid for effective soil stabilization to solve civil and site construction challenges throughout the industry.

## A shoutout to one of ADCO's outstanding employees – Randy Nelson.

We're proud to have team members who go above and beyond, not only on the job but in life as well. This month's standout employee is Randy Nelson, our Senior Estimator and Project Manager who serves all ADCO locations.

Randy is a key player in making sure projects run smoothly and efficiently. From quoting jobs to managing logistics, he brings a wealth of knowledge, precision, and dedication to every task. But there's more to Randy than pipes and pricing—he's also a passionate preacher. In fact, he's been preaching since he was 16! He's preached in churches in Alabama, Tennessee, Kentucky, Arizona, and even Rio de Janeiro.

Whether he's in the office or behind a pulpit, Randy delivers his message with energy, heart, and—let's be honest—a whole lot of words. Ask anyone who's worked with him: Randy *loves* to share information. That's part of his charm. His storytelling, warmth, and willingness to help make him a beloved figure across our locations.

When he's not wowing our customers or a congregation, Randy enjoys quality time with his wife of 40 years, Marilyn, and their three adult sons, Dustin, Cody, and Tanner. He also keeps busy with four grandchildren.

We're grateful to have Randy on the team. He's proof that at ADCO, our people make the difference.
